

What you should know about: Vitiligo.Clinic® Emollient

What is in this leaflet?:

The aim of this leaflet is to inform users of the benefits and risks of using Vitiligo.Clinic® Emollient.

Keep this leaflet with the Vitiligo.Clinic® Emollient as you may need to refer to it.

- **Always read the instructions carefully and take note of any warnings for use.**
- **Use Vitiligo.Clinic® Emollient within the lifespan indicated by the Period After Opening symbol or best before date.**
- **Never mix Vitiligo.Clinic® Emollient with other products.**
- **Apply Vitiligo.Clinic® Emollient with clean hands or an applicator that is routinely washed thoroughly with soap or a mild cleanser.**
- **If you are using applicators to apply Vitiligo.Clinic® Emollient ensure that the applicator is washed after use and allow applicators to dry completely before next use.**
- **Avoid sharing your personal Vitiligo.Clinic® Emollient with another person.**

What is Vitiligo.Clinic Emollient is used for?:

Vitiligo.Clinic® Emollient is used to assist in improving the appearance of uneven skin tone colour and complexion..

Vitiligo.Clinic® Emollient is applied to areas of the skin only where skin tone is lighter than normal skin.

It is recommended for best results that the Vitiligo.Clinic® Emollient is used in conjunction with Vitiligo.Clinic® Skin Prep Lotion as the two topicals complement each other. It is also recommended that, in order to address the systemic (internal triggers) the Vitiligo.Clinic® PSC 100 is ordered.

BEFORE you start to use Vitiligo.Clinic® Emollient :

ALWAYS apply a small amount on a small area as a **TEST PATCH** before use, especially if it is to be used in sensitive skin areas. Leave on for 24-48 hours without washing the area.

If you have a reaction of **any kind please notify the Distributor immediately.**

If there has not been a reaction apply the Vitiligo.Clinic® Emollient as directed.

If you have had any type of allergic reaction herbal extracts or essential oils in the past it is advisable to **TEST PATCH** your skin before using this product.

Directions for use:

Apply twice (2) x daily to affected lesions / facial area.

IMPORTANT TO NOTE:

If you use Vitiligo.Clinic® Emollient **less often** than you should, it may not work as well and the appearance of uneven skin tone may not improve.

By using Vitiligo.Clinic® Emollient **more often** than you should, you will not see notable improvement in skin tone any faster, and may actually aggravate your skin.

Side Effects:

If you experience any adverse reaction, **discontinue use** and see a practitioner immediately. It is also important to contact the distributor.

Safety and storage:

Keep out of reach of children.

If swallowed attend the emergency centre of your nearest hospital. DO NOT INDUCE vomiting.

Keep lid tightly on product when not in use.

Avoid storing product in direct sunlight or near sources of heat.

Store below 25°C – but do not freeze.
